ABOUT

AI Engineer & Full Stack Developer with 4 years of experience building backend APIs and web applications using Node.js, TypeScript, React and Python. Experienced in REST APIs, microservices, data-driven systems and AI-powered applications, with a focus on performance, observability and scalable architectures. Hands-on experience with LLMs, RAG, FastAPI and modern AI development workflows.

EXPERIENCE

Full Stack Developer, Avalith **2022 - Present**

- Designed and developed full-stack applications using Node.js, TypeScript, React, Next.js and SQL databases, delivering end-to-end solutions for business-critical workflows.
- Integrated LLM-powered capabilities into a studio management application, connecting AI services with backend workflows to provide contextual assistance and improve user interactions.
- Designed and implemented REST APIs supporting payment integrations, training platforms, attendance tracking and business operations across multiple application modules.
- Built and maintained backend services focused on reliability, maintainability and efficient business process execution, applying modular architecture and API design best practices.
- Worked with Docker-based development environments to support application setup, dependency management and consistent development workflows.
- Used AI development tools such as Claude for code analysis, debugging, refactoring, implementation and technical problem-solving, reviewing and validating generated code before integration.
- Applied AI integration concepts to application development, with a focus on connecting application workflows with AI capabilities and external services.
- Designed database models and optimized data structures to improve data consistency, query performance and maintainability.
- Implemented authentication, authorization and role-based access control across multiple business applications.

TECHNICAL SKILLS

- Backend: Python, FastAPI, Node.js, NestJS, Express, REST APIs, Microservices, Apify
- Frontend: React, Svelte, Next.js, Angular, TypeScript, JavaScript,
- Databases: PostgreSQL, MongoDB, DynamoDB, Supabase
- ORM: Prisma
- Caching & Messaging: Redis, Kafka, RabbitMQ, SQS
- Cloud & DevOps: AWS, Azure, Docker, Git, CI/CD
- AI & LLMs: LLMs, RAG, LangChain, LangGraph, AI Agents, Prompt Engineering

EDUCATION

UTN, Mar del Plata **2016 - 2022**

Bachelor’s degree in Computer Science, Graduate of the UTN, Mar del Plata

LANGUAGE

- C1 English
- Native Spanish
